ProStar 70 WDG Fungicide will prevent and provide curative activity against species of Sclerotium rolfsii, Rhizoctonia solani, Phytophthora cinnamomi, Botrytis cinerea, and Fusarium spp.

Application rates:
- For containers, use the following specified volumes per container size listed:
  - 2 fl oz (5 inch) per 100 gallons
  - 2 1/2 fl oz (4 inch) per 100 gallons
  - 8 1/2 fl oz (3 inch) per 100 gallons

Spray intervals:
- Apply to ground and raised beds at 1 pt per sq ft (4-inch depth or less) and 2 pts per sq ft for depths greater than 4 inches.
- For continuous agitation throughout application.
- Add the appropriate amount of ProStar 70 WDG Fungicide to a partially filled tank and follow previous instructions. Maintain constant agitation during application.
- Maintain good mixing when mixing multiple tank volumes, ensuring complete homogenization.
- Do not add the fungicide to undiluted water.
- The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the intake manifold.
Do not apply this product in a way that will contact workers or other persons, either directly or indirectly or through drift. Only responsible for pesticide regulation.

Remove and wash contaminated clothing before reuse. Avoid breathing dust.

If in Eyes:

If this product penetrated through your clothing or personal protective equipment, stop handling this product immediately, remove the clothing and equipment, wash your body thoroughly, and put on clean clothing and equipment before resuming the

Call a poison control center or doctor for treatment advice.
Move the person to fresh air.

If in Skin:

Rinse skin immediately with plenty of water for 15-20 minutes.

For best results, spray the treated area uniformly, using equipment such as flat fan nozzles. Use 50-mesh or larger screens. Avoid if the products are physically compatible.

Unless otherwise specified. (See bentgrass, perennial ryegrass, red fescue, tall fescue, bermudagrass, St. Augustinegrass, and zoysiagrass.

APPLICATION AND DOSE

Use this product only in accordance with its labelling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment.

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides. It contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment.

The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Offer for reconditioning, if appropriate.

PESTICIDE STORAGE:

Do not contaminate water, food or feed by storage or disposal.

The product contains no hazardous ingredients constituting a fire hazard. For best results, spray the treated area uniformly, using equipment such as flat fan nozzles. Use 50-mesh or larger screens. Avoid if the products are physically compatible.

Unless otherwise specified. (See bentgrass, perennial ryegrass, red fescue, tall fescue, bermudagrass, St. Augustinegrass, and zoysiagrass.

The product contains no hazardous ingredients constituting a fire hazard.
ProStar® 70 WDG
Fungicide
For Use on Turf and Ornamentals
A Systemic Fungicide for Management of Foliar, Soilborne, Cutting and Bulb Diseases Caused by Basidiomycete Fungi in Greenhouses, Saran and Shade Houses, Outdoor Container and Field-Grown Ornamental Nursery Stock.
ACTIVE INGREDIENT:
FLUTOLANIL: N-[3-(1-methylethoxy)phenyl]-2-(trifluoromethyl)benzamide .............................................. 70.0%
OTHER INGREDIENTS .............................................. 30.0%
TOTAL 100.0%
EPA Reg. No. 432-1477 EPA Est. No. 67545-AZ-01
KEEP OUT OF REACH OF CHILDREN
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Harmful if absorbed through skin. Harmful if inhaled. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Remove and wash contaminated clothing before reuse. Avoid breathing dust.
ENVIRONMENTAL HAZARDS
This product is toxic to aquatic invertebrates. For terrestrial uses, do not apply to water, areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.
STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
PESTICIDE STORAGE: Store in a cool, dry, secure place.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL:
Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Offer for reconditioning, if appropriate.
Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
Dispose of in a sanitary landfill, or by incineration; or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
Refer to attached leaflet for complete Directions for Use and Precautionary Statements.

First Aid
If on Skin or Clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.
If Inhaled:
• Move the person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.
If in Eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.
Have this product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-334-7577 for emergency medical treatment information.

ProStar 70 WDG Fungicide will prevent and provide curative activity against species of Rhizoctonia.

**DISPANGLE(S) CONTROLLED AND APPLICATION CONCENTRATIONS/RATES:**

- Apply this product only through an overhead, microjet, or drip irrigation system. Do not apply this product through any other type of irrigation system. Plant injury or lack of effectiveness can result from nonuniform distribution of treated water. If you have any pesticide supply tanks are recommended for the application of this product. See label instructions for dilution use rates and times to complete

**CUTTING & B&B (GR) APPLICATION INSTRUCTIONS:**

- For turf and ornamentals:
  - Use a system that monitors spray coverage and applies the correct amount of treated water to the specified area. Computerized, automatic irrigation systems are especially effective for this purpose. The irrigation system must be monitored for efficiency and effectiveness regularly. The system must be designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.
  - The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pressure decreases to the point where pesticide distribution is adversely affected.
  - The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.
  - A check valve must be installed at the point where treated water is to be introduced to the irrigation system and before any irrigation system component that could reduce the pressure of treated water below atmospheric. Treat water must be discharged into a reservoir tank prior to pesticide introduction. There shall be a complete physical break (air gap) in the fill pipe. When the irrigation system is either automatically or manually shut down, a person knowledgeable of the irrigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise. Public water system means a system for the provision to the public of piped water. Pesticide supply tanks are recommended for the application of this product. See label instructions for dilution use rates and times to complete

** Joey's Honda Lawn Mowing Services 123 Main Street 555-1234 **

**OTHER INGREDIENTS**

- 70 WDG
- Methyl Benzenesulfonate
- Water

**CONDITIONS:**

- Commercially pure ester derived from lauryl alcohol and acetic acid
- 14.7% Fipronil
- 3% Fungicide
- 2.5% Non-ionic Surfactant
- 30.0% Other Ingredients

**Fungicide Spray**

- The addition of a surfactant (wetting agent) may be considered. If addition is warranted, trial applications with ProStar 70 WDG Fungicide where adequate spray coverage is achieved. Should inadequate spreading of the ProStar 70 WDG Fungicide occur, the addition of a surfactant (wetting agent) may be considered. If addition is warranted, trial applications with ProStar 70 WDG Fungicide where adequate spray coverage is achieved.

**Foliar Spray Application**

- For turf and ornamentals:
  - Use a system that monitors spray coverage and applies the correct amount of treated water to the specified area. Computerized, automatic irrigation systems are especially effective for this purpose. The irrigation system must be monitored for efficiency and effectiveness regularly. The system must be designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.
  - The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pressure decreases to the point where pesticide distribution is adversely affected.
  - The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.
  - A check valve must be installed at the point where treated water is to be introduced to the irrigation system and before any irrigation system component that could reduce the pressure of treated water below atmospheric. Treat water must be discharged into a reservoir tank prior to pesticide introduction. There shall be a complete physical break (air gap) in the fill pipe. When the irrigation system is either automatically or manually shut down, a person knowledgeable of the irrigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise. Public water system means a system for the provision to the public of piped water. Pesticide supply tanks are recommended for the application of this product. See label instructions for dilution use rates and times to complete

**Important Read Before Use**

- Read the entire Directions for Use and the entire Warnings and Precautions to ensure correct use of this product. The presence of other materials, or the manner of use or application, may result in loss of control or unacceptable drift. When designing and applying this product, all of which are beyond the control of Bayer CropScience LP. All such risks shall be assumed by the user or buyer.

**Disclaimer of Warranties and Limitations of Liability**

- By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

**Termination**

- For termination, see label instructions for dilution use rates and times to complete

**Limited Liability**

- To the extent consistent with applicable law, Bayer CropScience LP disclaims any liability whatsoever for special, incidental or consequential damages resulting from the use or handling of this product.

**Disclaimer of Warranties**

- To the extent consistent with applicable law, the exclusive remedy of the user or buyer for any and all losses, injuries or damages resulting from the use or handling of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid, or at Bayer CropScience LP's election, the replacement of product.

**Use**

- The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pressure decreases to the point where pesticide distribution is adversely affected.

**Precaution for irrigation applications:**

- Where distribution patterns do not overlap sufficiently, unacceptable control may result.

**Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from nonuniform distribution of treated water. If you have any pesticide supply tanks are recommended for the application of this product. See label instructions for dilution use rates and times to complete

**For Use on Turf and Ornamentals**

APLICATION AND DOSAGE

For the specified usage conditions, ProStar 70 WDG Fungicide is intended for use as a tank mix at the rates shown in Table 1. ProStar 70 WDG Fungicide is labeled for use with certain fungicides as a tank mix in foliar applications for the control of foliar diseases on turfgrass species. Refer to label for compatibility information. ProStar 70 WDG Fungicide is labeled for tank mixing with the following fungicides: PCNB, Bayleton®, Banner®, Eagle®, 26 GT® or Daconil® to control both diseases. Repeat application 21 to 28 days later as a preventative and curative activity in the management of foliar, soilborne, and propagative diseases caused by rusts, species of Curvularia, species of Sclerotinia, and species of Rhizoctonia, species of Bremia, and species of Curvularia.

STORAGE AND DISPOSAL

STORAGE

ProStar 70 WDG Fungicide must be stored in a cool, dry, secure place.

DISPOSAL:

Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Offer for reconditioning, if appropriate.

USER SAFETY RECOMMENDATIONS

GENERAL INFORMATION

This product does not control dollar spot. If the products are physically compatible, Tank Mixes:

- PCNB, Bayleton®, Banner®, Eagle®, 26 GT® or Daconil® to control both diseases. Repeat application 21 to 28 days later as a preventative and curative activity in the management of foliar, soilborne, and propagative diseases caused by rusts, species of Curvularia, species of Sclerotinia, and species of Rhizoctonia, species of Bremia, and species of Curvularia.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Do not apply this product in a way that will contact workers or other persons, either directly or indirectly, or through drift. Only persons responsible for pesticide regulation may mix or apply the product.

**REMOVAL & WASHING INSTRUCTIONS**

Remove and wash contaminated clothing before reuse. Avoid breathing dust.

Applicators and other handlers must wear:

- Chemical resistant gloves made of any waterproof material, with anything that has been treated, such as plants, soil, or water, is:
- Eye protection that meets the ANSI Z87.1 standards.
- A mask or respirator that meets the NIOSH or the National Institute of Occupational Safety and Health, or the American National Standards Institute, or the Occupational Safety and Health Administration standards.
- It is recommended that handlers use N95 or N99 respirators.
- If on Skin:
  - Wash with soap and water. Do not use the toilet before thoroughly washing hands.
  - Remove clothing exposed to the product and wash the clothing separately from other laundry.
  - Wash skin with soap and water. If irritation persists, consult a medical professional.
- If in Eyes:
  - Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
  - If irritation persists, consult a medical professional.
- If Swallowed:
  - Do not induce vomiting.
  - If not nauseated, give 1 cup of water.
  - If nausea, give a tablespoon of olive oil or a teaspoon of vegetable oil.
  - If nausea persists, consult a medical professional.
- If on Clothing:
  - Remove clothing exposed to the product and wash the clothing separately from other laundry.

**PRECAUTIONARY STATEMENTS**

**PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact**

- Chemical resistant gloves made of any waterproof material,
- Eye protection that meets the ANSI Z87.1 standards,
- A mask or respirator that meets the NIOSH or the National Institute of Occupational Safety and Health, or the American National Standards Institute, or the OSHA standards.

**EQUIPMENT USES**

- This product is a systemic fungicide recommended for control of diseases of turf caused by Basidiomycetes. This product may be tank mixed with products labeled for control of that disease, such as PCNB, Bayleton, or Banner M AXX. Prior to application, both products should be mixed in small volumes to ascertain physical compatibility.

**ADDITIONAL INSTRUCTIONS**

- For use rates over 2.2 oz per 1,000 sq ft, do not apply ProStar 70 W DG Fungicide within 100 feet of any estuary or marine habitat.
- The product is not recommended for use in nurseries or greenhouses that do not obtain a permit through the New York State Department of Environmental Conservation for use of fungicides or pesticides.
- For foliar applications to field grown or outdoor container grown ornamentals, apply the spray mixture to obtain optimum coverage of the foliage.
- Verify prior to subsurface applications have been beneficial in some cases. Use of a nonionic surfactant in combination with ProStar 70 W DG Fungicide is recommended. Treated areas should be irrigated prior to and after application with sufficient water.

**NOTES**

- For use in greenhouses, nurseries, and shade houses, outdoor container and field grown ornamentals, nursery stock, and sheltered ornamentals, use the following directions:

**FOR THE STATE OF NEW YORK USE THE FOLLOWING DIRECTIONS:**

**NURSERIES AND SHADY HOUSES:**

- For use rates over 2.2 oz per 1,000 sq ft, do not apply ProStar 70 W DG Fungicide within 100 feet of any estuary or marine habitat.
- For use in nurseries and shady houses that do not obtain a permit through the New York State Department of Environmental Conservation for use of fungicides or pesticides.
- The product is not recommended for use in nurseries or greenhouses that do not obtain a permit through the New York State Department of Environmental Conservation for use of fungicides or pesticides.
- For foliar applications to field grown or outdoor container grown ornamentals, apply the spray mixture to obtain optimum coverage of the foliage.
- Verify prior to subsurface applications have been beneficial in some cases. Use of a nonionic surfactant in combination with ProStar 70 W DG Fungicide is recommended. Treated areas should be irrigated prior to and after application with sufficient water.
**Do not apply this product in a way that will contact workers or other persons, either directly or indirectly or through drift.**

**CAUTION**

Do not contaminate water when disposing of equipment washwaters.

- Long-sleeved shirt and long pants.

Applicators and other handlers must wear:

- Chemical resistant gloves made of any waterproof material,

**Risk Assessment**

If in Eyes:

- Wash with water for 15 minutes, unless medical advice is obtained sooner. Do not rub eyes.

If on Skin:

- Wash with soap and water for 15 minutes, unless medical advice is obtained sooner.

If Inhaled:

- Remove to fresh air. Do not induce vomiting unless instructed to do so by medical personnel.

**Emergency Response**

**Call a poison control center or doctor for treatment advice.**

- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

- Move the person to fresh air.

- Take off contaminated clothing.

- Remove shoes, stockings, and other clothing. Wash skin with soap and water. Take off any contaminated clothing, shoes, or other articles of clothing and wash with soap and water. If clothing is not washable, discard it.

**USER SAFETY RECOMMENDATIONS**

- Read entire label before using this product.

**DIRECTIONS FOR USE**

**AGRICULTURAL USE REQUIREMENTS**

- The product may be used in turf and ornamental turf areas. CPUA registration is required for pro-active use on ornamental turf.

**PRECAUTIONARY STATEMENTS**

- Application to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

- When spray drift occurs, do not allow applications to drift onto or contact edible crops that may enter the food chain.

- Do not apply when ambient air temperatures are below 40°F (4°C) or above 90°F (32°C) or when wind is likely to cause drift.

- Do not apply when ambient air temperature is at or below 50°F (10°C) or above 85°F (29°C) or when wind is likely to cause drift.

- This product is a systemic fungicide. Do not apply unless disease is present or is expected to be present. Disease must be controlled before symptom development to achieve disease control.

- This product may be applied with or without a surfactant. Use of a surfactant is recommended to improve disease control.

- Do not exceed the recommended rates.

- Use the appropriate application techniques and equipment for adequate uniformity of coverage.

- Use only as directed. Failure to follow the directions for use and precautions on this label may result in poor disease control or plant injury.

**SAFETY INFORMATION**

- This pesticide contains a hazardous ingredient(s) that is/are a known human carcinogen.

**DISPOSAL OF CONTAMINATED MATERIAL**

- Discard clothing and personal protective equipment that cannot be reused, including clothing and other absorbent materials that come in contact with the product or drift. Wash all contaminated materials prior to reuse.

**CONTAINER DISPOSAL:**

- Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Offer for reconditioning, if appropriate.

**PESTICIDE STORAGE:**

- Store this product in its original container in a cool, dry place out of the reach of children.

**ENVIRONMENTAL HAZARDS:**

- This product contains herbicides that are hazardous to fish and wildlife. Do not apply near water. Do not contaminate water when disposing of equipment washwaters.

**APPLICATION PATTERNS**

- Use the appropriate application techniques and equipment for adequate uniformity of coverage.

**USER SAFETY RECOMMENDATIONS**

- Read entire label before using this product.

**CAUTION**

Do not eat, drink, smoke, or chew gum or tobacco while handling this product and until hands and face are thoroughly washed.
Do not apply this product in a way that will contact workers or other persons, either directly or indirectly or through drift. Only professional applicators as specified on this label are authorized to apply this product.

**CAUTION**

This product is toxic to aquatic invertebrates. For terrestrial uses, do not apply to water, areas where surface water is present or where surface water may be present. (C)ontact with skin can cause skin irritation. (R)espiratory irritation can occur. Avoid breathing dust. If you become ill, contact a doctor.

- Long-sleeved shirt and long pants,
- Chemical resistant gloves made of any waterproof material,
- Mask or respirator.

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 C.F.R. part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of this product. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment.

**NON-AGRICULTURAL USE REQUIREMENTS**

When using this product other than on turf, read and follow all label instructions and precautions. The use of this product is subject to the following limitations:

- Do not use on or in food or on food-contact surfaces.
- Do not apply to any area where exposed food or food-contact surfaces are present.
- Do not contaminate any surface of the food with the used spray equipment or material.
- Do not apply or store the material in any manner that results in drift onto or contamination of food or food-contact surfaces.
- When applying this product near food or food-contact surfaces, follow all precautions and instructions on the label.

**STORAGE AND DISPOSAL**

- Store in a cool, dry place.
- Keep out of reach of children.
- Do not contaminate water, food, or feed by storage or disposal. Clean equipment, tools, and clothing immediately after use.

**USER SAFETY RECOMMENDATIONS**

**PRECAUTIONARY STATEMENTS**

**DANGERS TO HUMAN AND ENVIRONMENTAL HEALTH**

ProStar 70 WDG Fungicide is toxic to aquatic life. Avoid contact with rivers, lakes, ponds, and streams. Do not contaminate water, feed, or food or areas where they will be handled.

- Do not contaminate water, food, or feed by storage or disposal. Clean equipment, tools, and clothing immediately after use.

- Store in a cool, dry place.
- Keep out of reach of children.

**GENERAL INFORMATION**

- Read entire label before using this product.
- Familiarize yourself with the use and limitations of the product before using it.
- Do not use this product on or in food or on food-contact surfaces.
- Do not apply to any area where exposed food or food-contact surfaces are present.
- Do not contaminate any surface of the food with the used spray equipment or material.
- Do not apply or store the material in any manner that results in drift onto or contamination of food or food-contact surfaces.

**USE RESTRICTIONS**

- Do not use this product on or in food or on food-contact surfaces.
- Do not apply to any area where exposed food or food-contact surfaces are present.
- Do not contaminate any surface of the food with the used spray equipment or material.
- Do not apply or store the material in any manner that results in drift onto or contamination of food or food-contact surfaces.

**ENVIRONMENTAL IMPACTS**

- This product is toxic to aquatic invertebrates. Avoid contact with rivers, lakes, ponds, and streams.
- Do not contaminate water, food, or feed by storage or disposal. Clean equipment, tools, and clothing immediately after use.
- Store in a cool, dry place.
- Keep out of reach of children.

**DIRECTIONS FOR USE**

**FOUR-WAYED TURF**

- Apply 3.0 to 4.5 oz of ProStar 70 WDG Fungicide per 1,000 sq ft of green or tee area in 2 to 5 gallons of water in the fall prior to leaf drop.
- Timing (days)
  - Red Thread/Large Patch: <20
  - Pink Patch: 2-4
  - Gray Leaf Spot: 2-4
  - White Leaf Spot: 2-4

**LARGE PATCH**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.
- A nonionic surfactant is recommended for best results.

**RED THREAD/LARGE PATCH**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**RED THREAD**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**WHITE LEAF SPOT**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**STEEL BAND**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**TYPHULA INFECTION**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**PINK PATCH**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**GRAY LEAF SPOT**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**CUREATIVE**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**PREVENTATIVE**

- Apply 2.2 oz of ProStar 70 WDG Fungicide per 1,000 sq ft in 2 to 5 gallons of water and repeat 30 days later if symptoms persist.

**FOLIAR APPLICATIONS TO FIELD-GROWN OR OUTDOOR CONTAINER GROWN ORNAMENTAL PLANTS**

- Use the manufacturer's recommended dosage rate for each application.
- Add the appropriate amount of ProStar 70 WDG Fungicide to a partially filled spray or drench tank. Maintain continuous agitation to avoid settling.
- Use of a nonionic surfactant in combination with this product is recommended for best results.
- Do not use this product on fruit or nuts for food or feed purposes.
- Do not make more than 4 applications of ProStar 70 WDG Fungicide per year to ornamental plantings.

**USE RESTRICTIONS**

- Do not use on or in food or on food-contact surfaces.
- Do not apply to any area where exposed food or food-contact surfaces are present.
- Do not contaminate any surface of the food with the used spray equipment or material.
- Do not apply or store the material in any manner that results in drift onto or contamination of food or food-contact surfaces.
ProStar 70 WDG Fungicide will prevent and provide curative activity against species and
conditions of Sclerotium rolfsii.

**CONDITIONS:**

- The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
- Injecting a larger volume of a more dilute mixture per hour will usually provide more accurate calibration of metering equipment. Maintain sufficient agitation to keep the fungicide in suspension.
- The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the intake side of the injection pump.
- The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake fill pipe.
- The system must contain a functional, reduced-pressure zone, back-flow preventer (RPZ) or the functional equivalent in the water system. Injecting a larger volume of a more dilute mixture per hour will usually provide more accurate calibration of metering equipment. Maintain sufficient agitation to keep the fungicide in suspension.
- The system must contain a functional, reduced-pressure zone, back-flow preventer (RPZ) or the functional equivalent in the water system. Injecting a larger volume of a more dilute mixture per hour will usually provide more accurate calibration of metering equipment. Maintain sufficient agitation to keep the fungicide in suspension.

- The system must contain a functional, reduced-pressure zone, back-flow preventer (RPZ) or the functional equivalent in the water system. Injecting a larger volume of a more dilute mixture per hour will usually provide more accurate calibration of metering equipment. Maintain sufficient agitation to keep the fungicide in suspension.

** Use Precautions, Notice to User:** Phytotoxicity can result from such additions; therefore, use a detergent with a very low alkyl content.

**Use Precautions:** Use this product only through pressurized drench (flood), sprinkler, or drip (trickle) irrigation systems. Do not apply this product through any other type of irrigation system unless the pesticide label-prescribed safety devices for public water systems are in place. A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make appropriate repairs.

**IMPORTANT READ BEFORE USE**

- Read the entire Directions for Use, Conditions, Disclaimer of Warranty and Limitations of Liability before using this product. If you have questions about calibration, you should contact State Extension specialists, equipment manufacturers, or other experts. Do not use this product unless you are familiar with the system and have been trained in the use of it. Do not apply this product through any other type of irrigation system unless the pesticide label-prescribed safety devices for public water systems are in place. A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make appropriate repairs.

**Other Warranties, Express or Implied, of Merchantability or of Fitness for a Particular Purpose or Otherwise:** Where distribution patterns overlap excessively, injury to desirable plants may result.

**Applicable Law:** Bayer CropScience LP disclaims any liability whatsoever for special, incidental or consequential damages.

**Disclaimer of Warranty and Limitations of Liability:** Bayer (reg'd), the Bayer Cross (reg'd), ProStar®; Bayleton®; 26 GT® and Backed By Bayer TM are trademarks of Bayer.
Fungicide application instructions and precautions:

**PRODUCT INFORMATION:**
ProStar 70 WDG is a systemic fungicide for the prevention and control of various diseases in ornamentals, vegetables, and turfgrass. It contains 70% metalaxyl-M, an active ingredient that provides broad-spectrum control of diseases caused by a wide range of fungi.

**USE:**
- **Cutting and Bulb Diseases Caused by Basidiomycete Fungi:**
  - For use in greenhouses, saran and shade houses, and outdoor environments.

**APPLICATION:**
- **Cutting and Bulb Diseases Caused by Basidiomycete Fungi:**
  - Spray the entire plant at the rate of 1 pt per sq ft (4-inch depth or less) and 2 pts per sq ft for depths greater than 4 inches.
  - If seedling trays are used, apply at 1 pt/sq ft.
  - For nursery container production, apply at 2 1/2 fl oz per gallon spray.
  - For depths greater than 10 inches in nursery container production, a drench volume of 2 1/2 to 3 pts per sq ft of surface area may be required.

**MIXING AND APPLICATION INSTRUCTIONS:**
- Add ProStar 70 WDG to a partially filled tank and follow previous instructions. Maintain continuous agitation throughout application.
- ProStar 70 WDG can be applied alone or in tank mixtures with other pesticides which are registered for overhead, microjet, or drip irrigation.

**OVERHEAD, MICROJET, OR Drip Irrigation Application:**
- Apply this product only through a pressurized drench (flood), sprinkler, or drip (trickle) irrigation system. Do not apply this product to crops via any systemic chemigation system.

**CHEMICATION INFORMATION:**
- Use of a compatible surfactant may improve coverage and uptake. Often, the addition of surfactants will aid in the dispersion of active ingredients into the treated water.
- If you need to add the appropriate amount of ProStar 70 WDG to a partially filled tank and follow previous instructions. During dipping of seedlings or nursery plants, apply 3 to 6 oz per 100 gallons.
- If a surfactant is warranted, trial applications should be conducted to determine the optimal surfactant concentration.
- Use of a compatible surfactant may improve coverage and uptake. Often, the addition of surfactants will aid in the dispersion of active ingredients into the treated water.

**IMPORTANT READ BEFORE USE:**
- Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product.
- If you have questions about calibration, you should contact State Extension specialists, equipment manufacturers, or other experts. Do not apply ProStar 70 WDG when wind speed favors drift beyond the area intended for treatment.
- Do not apply ProStar 70 WDG when wind speed favors drift beyond the area intended for treatment.

**LIMITATIONS OF LIABILITY:**
- To the extent consistent with applicable law, the exclusive remedy of the user or buyer shall not exceed the purchase price.

**WARNING:**
- Do not apply ProStar 70 WDG when wind speed favors drift beyond the area intended for treatment.
- Do not apply ProStar 70 WDG when wind speed favors drift beyond the area intended for treatment.
- Do not apply ProStar 70 WDG when wind speed favors drift beyond the area intended for treatment.

**REPRESENTATIVE DIRECTIONS FOR USE:**
- For MEDICAL AND TRANSPORTATION Emergencies ONLY: Call 24 Hours a Day 1-800-334-7577.
**ProStar 70 W DG** Fungicide will prevent and provide curative activity against species of Rhizoctonia per 100 gallons. Apply to ground and raised beds at 1 pt per sq ft (4-inch depth or less) and 2 pts per sq ft for depths greater than 4 inches. Irrigate immediately after application to ensure control of soil-borne pathogens. Retreatment with ProStar 70 W DG Fungicide 21 to 28 days after the initial application. Apply ProStar 70 W DG Fungicide at 3 to 6 oz per 100 gallons Sprays Intervals in Days

*Note: Above 10 inches in nursery container production, a drench volume of 2 1/2 to 3 pts per sq ft of surface area may be required.*

**Mixing and Application Instructions:**

- Foliar: In a partially filled tank, mix ProStar 70 W DG Fungicide with previous instructions. Maintain constant agitation throughout application. If surfactant is required, add the appropriate amount of ProStar 70 W DG Fungicide to a partially filled tank and follow previous instructions. Maintain constant agitation throughout application. If surfactant is required, the addition of a surfactant (wetting agent) may be considered. If addition is warranted, trial applications to determine performance of plant protection products under certain conditions. Generally, surfactants (wetting agents) are not required if mixing is done with care.

- Soil Drench: Apply ProStar 70 W DG Fungicide alone or in tank mixture with other pesticides which are registered for overhead, microjet, or drip irrigation. With bulbs, corms, and rhizomes, dip cleaned units for 5 minutes and allow to dry prior to planting, as well as following previous instructions.

**Chemigation Information:**

- Fungicide spray occurrence, the addition of a surfactant (wetting agent) may be considered. If addition is warranted, trial applications to determine performance of plant protection products under certain conditions. Generally, surfactants (wetting agents) are not required if mixing is done with care.

**Chemigation Application Instructions:**

- The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank or storage tank. Injecting a larger volume of a more dilute mixture per hour will usually provide more accurate calibration of metering pumps used in irrigation systems. The volume rate of the chemical to be metered should be set proportionately to the total volume of water to be applied in the same time interval. For example, if the ratio of chemical to water is 1:100, then 1 gallon of chemical should be injected into the 100 gallons of water to be applied in the same time interval. If the water volume is doubled, the chemical volume must be doubled to maintain the same ratio.

**Important Read Before Use:**

- The directions for use of this product are believed to be adequate and must be followed carefully. However, it is

**Disclaimer of Warranties:**

- The directions for use of this product are believed to be adequate and must be followed carefully. However, it is possible that the user or buyer may have or choose to adopt a standard of performance different from that recommended by Bayer CropScience LP. Bayer CropScience LP is not liable for such a standard and has no control over any such standard.

**For Use on Turf and Ornamentals**

**For PRODUCT USE Information 1-800-331-2867**

Call 24 Hours A Day 1-800-334-7577
ProStar 70 WDG Fungicide will prevent and provide curative activity against species of Rhizoctonia, Retreat with ProStar 70 WDG Fungicide 21 to 28 days after the initial application. Apply ProStar 70 WDG Fungicide at 3 to 6 g ai per acre in a carrier volume of 100 to 200 gallons.

Add the appropriate amount of ProStar 70 WDG Fungicide to a partially filled tank and follow previous instructions. Maintain conditions. Must be followed, using the instructions in the section Use Precautions, Notice to User, as phytotoxicity can result from such mixing.

**FOLIAR SPRAY APPLICATION**

- **Foliar Rhizoctonia**: 3 to 12 g ai per acre
- **Rusts**: 3 to 6 g ai per acre

**FOOLIAR SPRAY APPLICATION INSTRUCTIONS**

- Always apply ProStar 70 WDG Fungicide at the rate recommended on this label. Due to the systemic nature of the product, a single application may be applied in irrigation water at rates recommended on this label. Follow the label directions for the most restrictive rate.
- If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers, or previously stated PPE requirements.
- Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from nonuniform distribution of treated water.
- Pesticide supply tanks are recommended for the application of this product. See label instructions for dilution use rates and times.
- Do not connect any irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety device for public water systems are in place. A person knowledgeable of the chemigation system and responsible for its operation or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

**OVERHEAD, MICROJET, OR Drip IRRIGATION APPLICATION**

- Do not apply when wind speed favors drift beyond the area intended for treatment.
- With bulbs, corms, and rhizomes, dip cleaned units for 5 minutes and allow to dry prior to planting, as well as following previously stated PPE requirements.
- With overhead or microjet systems, apply enough water to thoroughly wet the potting media.
- With bulbs, corms, and rhizomes, dip cleaned units for 5 minutes and allow to dry prior to planting. Wear clothing outlined in PPE requirements daily or at least 60 days out of the year.

**DISCLAIMER OF WARRANTIES**

- To the extent consistent with applicable law, Bayer CropScience LP makes no warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise applicable law, Bayer CropScience LP disclaims all liability whatsoever for special, incidental or consequential damages. Bayer CropScience LP is not responsible for any losses, injuries or damages resulting from the use or handling of this product, price paid, or at Bayer CropScience LP's election, the replacement of product.
